Abstract

Women stand club is website platform where women can connect with each other. Especially for professional or entrepreneur women to help the new or young women specially student to guide them related to business or professional world. The women of any field can join this platform to help and train and guide each other and even for job seeker women's or for counseling or learning. The women stand club is the website for women to empower each other.

Introduction

Women stand club is a website for the women community. This website provides the opportunity to the women of all the fields and female students to join on one platform. Women stand club where women stand with other women to guide and to help each other. Business women's professional, housewife and students and all kind of women can use this website to inspire the other women by sharing ideas of business, and personal counseling, and career counseling especially for women student who are unaware or have lack of knowledge or mostly confuse of their field.

As in lockdown situation this platform gives the opportunity to women to learn skills from professional women who have joined this website or skills or gets knowledge by using this website learning area.

The main focus of this platform is empowering the women and give them business counseling, career counseling, and specially mediation and depression counseling. As many women face the depression by staying at home especially in lockdown as it also affects the students. In lockdown everything moves to online technology, women should also learn new technology to promote herself and her skills or help other women to stand for her.

Background/Literature Review

Previous there is a lot of other website related to women empowerment and these websites playing their role in life of the women but every website covers the one specific or selective area like some website pay attention to career counseling other mental health and some technology skills and training area etc.

The issue with the existing system is that they provide focus on one specific area. Which make it difficult for the women to find all the related information or guidance on one platform. They use

different website for different purpose and did not find all the professional or working or counseling detail on one platform.

Proposed Solution

The proposed solution is to provide all the counseling professional guidance and training or empower the women for business on one platform. The women stand club website provide all the services related to women especially for the youth who wants to get any guidance or training. The women stand club creates the platform where the professional successful working women to connect on one platform and help each other according to their skills or experience.

The most main feature is to let the women to the connect online and even connect with the professional women to get training or guidance and the other main feature is that youth or young women can join this platform for career counseling and for getting experience from the professional working or successful women. This platform is for women and this platform creates the way to let women connect with each other and inspire and motive each other especially for learning. Entrepreneur women can post the job for the job seekers and job seekers can check the job.

Motivation

- The motivation of creating this platform is to create the platform for the women where all the fields of the women can connect with each other.
- The women of the field can inspire and empower each other.
- The professional women can help the young women.
- The counseling will be provided for the women.
- The women did not look for the different platforms where they find the information related to their interest.
- The professional or experience women can help and guide the young or lack of knowledge women.
- The professional women can post the job and job seeker can also check out the job section.
- The women any share any learning material for the women to learn.
- The women can even share their experience or knowledge in the blog area for the other women to look and read.

Objectives

- The objective is to empower the women.

- The women can register create profile
- The women can find all the option related to their interest in one platform.
- The women can get the counseling sitting at home and connected with professional.
- The women can get the job information by sitting at home.
- It reduces the time of women for searching and use the one service of one specific website.
- The women can learn through this website.
- The website has a user-friendly interface which makes it easy for use.
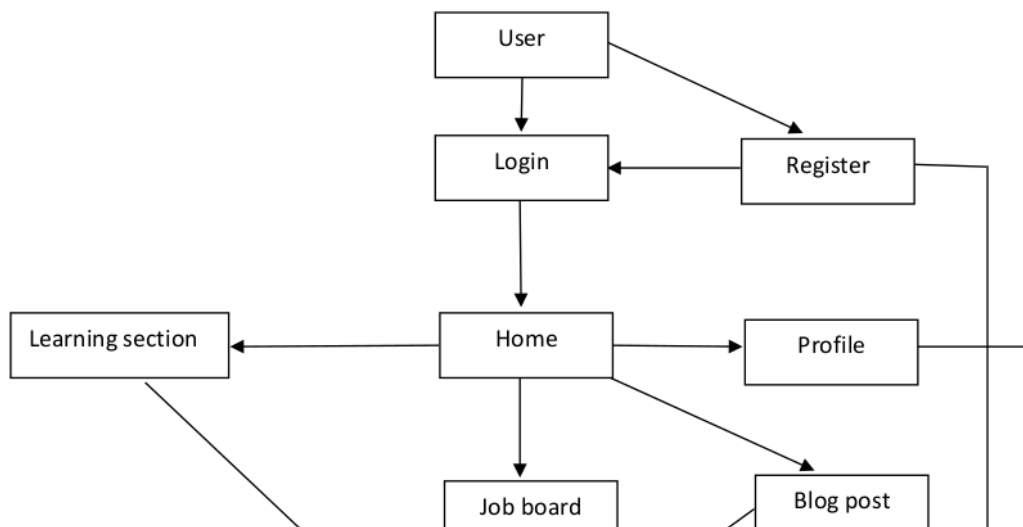

Methodology

We are going to use the following modules in our project:
Users: (women)

1. 1. User can register in the website.
2. After registration user can login in its account to complete the profile.
3. The user can select the interest of this field to read the information about it on the blog section and learning section.
4. The user uploads the eBook, video or audio in the learning section area for other user.
5. The professional women can provide counseling to young women specially student.
6. The professional or entrepreneur women can post the job.
7. The other job seeker user can check the post on the job board.

Architecture diagram

Tools & Technology

- Designing: HTML & CSS
- Front-end Development: HTML, CSS, Bootstrap & React.js
- Backend Language: Node.js
- Database: MYSQL

Work plan

Explanation:
1. Full Designing with further analysis of project:

- We will make design according to the requirements of the whole project and for the designing work we will use html, CSS and bootstrap.
2. Front End with 50% backend code + Testing:
    - Our front-end developers will do their job when the design of the project completed and within 3 months, we will do the front end and back end development of the user and about 50% of the work will be completed within the 3 months.
3. Front End and backend of all the website with testing:
    - All the remaining work of website will be completed within these 3 and half months. Also, our front-end and backend will complete the work within this timeline of 3 and half months and we will also do the testing according to the workflow.
4. Final Evaluation of whole project + Thesis writing:
    - Once all the work completed (Designing + front end + back end), we will do the final evaluation of the whole project and will also write the thesis within 2 months.
